SKILLS

- **Languages:** C++, Java, Python
- **Frameworks & Libraries:** Pandas, NumPy, Scikit-learn, OpenCV, FastAPI, HTML, CSS
- **Tools & Platforms:** MySQL, Git, GitHub, Figma, VS Code
- **Core CS Fundamentals:** DBMS, OS, CN, SQL, OOPs
- **Soft Skills:** Time Management, Problem-Solving, Adaptability, Quick Learner

PROJECTS

StudyAI – AI Study Assistant using NLP & RAG | [GitHub](#) May' 2026

- Built a full-stack AI study assistant using RAG where AI answers exclusively from student-uploaded documents, eliminating hallucination significantly.
- Engineered sentence-boundary-aware chunking with 80-word overlap, SBERT embeddings (all-MiniLM-L6-v2), and ChromaDB cosine similarity retrieval for semantic document search.
- Implemented subject-aware filtered retrieval, real-time SSE token streaming, and source-cited responses with document name and relevance percentage.
- Developed RAG-powered chat, AI-generated MCQ quizzes with, abstractive summarization, and a personalized adaptive study scheduler.
- **Tech Stack:** Python, FastAPI, ChromaDB, Gemini API, Text Chunking

Run Conquer – Gamified GPS Territory Running App | [GitHub](#) Mar' 2026

- Built an end-to-end gamified running app where players physically conquer real map territories by running GPS routes, with ML-powered cheat detection preventing GPS spoofing and driving.
- Engineered a feature extraction pipeline from raw GPS data (speed variance, acceleration patterns) and trained Random Forest classifier with 5-fold stratified cross-validation for cheat detection
- Designed a Ridge Regression pace prediction model using a sklearn Pipeline with StandardScaler, predicting finish time from distance, elevation, heart rate, and temperature inputs.
- **Tech Stack:** Python, FastAPI, Scikit-Learn, NumPy, SQLite

Real Time Vehicle Tracking – ML Model | [GitHub](#) Dec' 2025

- Built a real-time multi-vehicle detection and tracking system using YOLO11n for object detection and BoT-SORT for robust multi-object tracking across video frames.
- Implemented object detection and centroid-based tracking with OpenCV for stable multi-vehicle tracking.
- Optimized inference for CPU deployment, achieving stable real-time FPS while detecting vehicles video streams.
- **Tech Stack:** Python, FastAPI, YOLO11n, BOT- SORT, Pandas, NumPy

TRAINING

Lovely Professional University - Data Structures and Algorithms | [Link](#) Jun' 2025 – Jul' 2025

- Built a movie ticket booking website using key DSA concepts—greedy seat allocation, hashing, graph recommendations, max heap trends, and stack navigation.
- Gained strong understanding of Data Structures including arrays, linked lists, stacks, queues, trees, and graphs.
- Applied DSA concepts to real-world problem solving through hands-on project work.
- **Tech stack:** Java, Data Structures and Algorithms

CERTIFICATES

- Oracle Data Platform Certified Foundations Associate – ORACLE | [Link](#) May'2026
- Oracle Cloud Infrastructure Certified AI Foundations Associate – ORACLE | [Link](#) Mar' 2026
- Generative AI App Building (No-Code Tools) – Udemy | [Link](#) Aug'2025
- GenAI Powered Data Analytics Job Simulation (Forage) – TATA | [Link](#) Jun'2025
- Data Structures & Algorithms – LPU (NeoColab) | [Link](#) Dec'2024
- Bits and Bytes of Computer Networking – Google (Coursera) | [Link](#) Sept' 2024

ACHIEVEMENTS

- Earned top badges on **Leet Code** and **Hacker Rank**, including a 5-star rating in C++ for consistent performance. Mar' 2026
- Solved 150+ coding problems across **Leet Code**, sharpening problem-solving skills. Feb' 2026

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.93 Aug' 2023 - present

Academic World School Bemetara, Chhattisgarh
Intermediate; Percentage: 72% April' 2022 – March' 2023

Academic World School Bemetara, Chhattisgarh
Matriculation; Percentage: 77% April' 2020 – March' 2021
